

GW: 10.11.0.1

The diagram illustrates a network configuration for two different types of units, 401C and 171C, connected to a central 2x DM-024/1 3RD.J unit.

Left Section (401C Units):

- Unit 15 (08DC321):** Contains a switch (SW1) with IP 08.301.166.101 and a server (S1) with IP 08.301.166.001. It is connected to the 2x DM-024/1 3RD.J unit.
- Unit 16 (08DC321):** Contains a switch (SW2) with IP 08.301.166.101 and a server (S2) with IP 08.301.166.001. It is connected to the 2x DM-024/1 3RD.J unit.

Right Section (171C Units):

- Unit 10 (08DC315):** Contains a switch (SW1) with IP 08.315.81.00001 and a server (S1) with IP 08.315.81.00001. It is connected to the 401C unit.
- Unit 11 (08DC317):** Contains a switch (SW2) with IP 08.317.81.00001 and a server (S2) with IP 08.317.81.00001. It is connected to the 401C unit.
- Unit 12 (08DC324):** Contains a switch (SW3) with IP 08.324.81.00001 and a server (S3) with IP 08.324.81.00001. It is connected to the 401C unit.
- Unit 13 (08DC329):** Contains a switch (SW4) with IP 08.329.81.00001 and a server (S4) with IP 08.329.81.00001. It is connected to the 401C unit.

The diagram shows various network components like switches, routers, and servers, along with their IP addresses and network names. The connections are color-coded: green for the 401C units and blue for the 171C units.

The diagram illustrates the control system architecture for a 1000 MW boiler. It features a central Ethernet switch (1S07) connected to three main components: the PLC (08DC002), the DCS (08DC001), and a power supply unit (1S05). The PLC (08DC002) is connected to the switch via an Ethernet connection (ETH) and is linked to various modules including DSC 1616E, DMC1000, DMC1146, and DPM-PRVOD. The DCS (08DC001) is connected to the switch via an Ethernet connection (ETH) and is linked to modules such as DSC 1008B3, DMC1146, and DPM-PRVOD. The power supply unit (1S05) is connected to the switch via an Ethernet connection (ETH) and is linked to modules like DSC 1008B3, DMC1146, and DPM-PRVOD. The diagram also shows the connection to the control system (1S06, 1S25) via a MODBUS connection.
